REQUIREMENTS (When used in interrogating [REDACTED] the following questions may be classified FOR OFFICIAL USE ONLY. These questions must not be used for any other source unless the source has previously alluded to the information contained in these questions.)

1. In what way did the source hear of the new factories to the northwest of Saratov? How did he know about the missile plant? Can source distinguish between rocket and missile plant?  
*determine whether this is a*

2. Were residents in the vicinity of the new industrial area disturbed by loud blasts from rocket engine testing at the missile plant? If so, estimate in what year and month the testing began and how many tests occurred each day or week. Was the frequency of testing increased or decreased at any time? Describe the tests--number of explosions, duration of test, color of smoke or steam.

3. Were residents of Saratov generally aware of the military production in this area? Were they aware of the missile production?

4. Did the source know of large scale employee recruitment for the new factories or for the missile plant? In what years did this occur? Were the workers recruited locally or from other cities?

5. Was the source acquainted with anyone who worked at the new factories or lived in the area? Were the employees required to sign secrecy agreements?

6. Was there any association between the missile production at the new missile factory and the order for missile carriers at Plant #292? Were the orders handled by the same military representatives or Ministry? Was there any exchange of plant personnel or technical experts? When did this occur?

7. The source stated previously that the order for construction of the carriers at Plant #292 was received via the Ministry of Defense from a plant in the Urals (Refer to [REDACTED]). Can the source elaborate further on this statement? Was there any connection between the plant in the Urals and the missile plant in Saratov? Did the source intend to imply in the previous report that the missiles associated with the carriers manufactured at Plant #292 were produced at the Urals factory?

25X1A2g

8. Can the source contribute any more details concerning factories which were to be re-located in the new area? What are the present locations and production activities of these factories? When will the move occur?

NOFORN CONTINUED CONTROL

9. The source has stated that industrial expansion to the northwest has been in process since 1950. At what date was construction initiated on the missile plant? Was the missile plant one of the first of the new factories to be constructed in this area? Was missile plant construction completed before the source left Saratov in May 1957?

10. Can the source give any further general information concerning the new industrial area, e.g., names of nearby residential areas or towns, bus lines, postal zone numbers, names of train stations or post offices? Did the source visit or correspond with persons in this area? Was there an airport in this vicinity? What was the name of the airport? Can the source pinpoint any significant locations in the vicinity of the missile plant which were not shown in attachments to previous reports?

11. Are there any restrictions on travel in the vicinity of the new industrial area? Are the factories in this area heavily guarded? Can the area be viewed from the main road or from side roads?

12. Did the source ever observe missiles in the city of Saratov?

13. Is the work at the missile factory more sensitive than the work at Plant #292?

14. Did Plant #292 supply any parts to factories in the new northwest industrial area or to the missile plant?

15. Are any components for the missile factory produced at other factories in the new industrial area or elsewhere in Saratov?

16. Can source recall any pieces of equipment in or around Saratov which he associates with the missile plant?
